

ZISA WIFI AC Gateway

AC93/94/95

Description

The businesses of today are demanding ever greater flexibility and security from their wireless networks to keep up in a world where things move fast. ZISA's new Auranet CAP series delivers that and more. CAP access points work together with Auranet Wireless Controllers to provide scalable solutions with exceptional Wi-Fi performance and easy deployment.

Specifications

Model : AC93 Device Interface : Six 1000 Gigabit Ethernet Chassis : 19-inch 2U Rackmount Power Supply : 220V VAC Power Consumption : 80W Application Scenario : 3000 Terminals	Model : AC94 Device Interface : Six 1000 Gigabit Ethernet + 2*10 GE SFP Chassis : 19-inch 2U Rackmount Power Supply : 220V VAC Power Consumption : 100W Application Scenario : 5000 Terminals	Model : AC95 Device Interface : Six 1000 Gigabit Ethernet + 2*10 GE SFP Chassis : 19-inch 2U Rackmount Power Supply : 220V VAC Power Consumption : 120W Application Scenario : 7500 Terminals

Features

- Reliable Gateway performance features DPI-based (Deep Packet Inspection) traffic shaping.
- All-in-one routers offer a robust set of gateway, DPI-based traffic shaping, AC control, portal authentication features, providing capital efficiency by reducing initial installation cost.
- Access from multiple external networks is allowed, delivering bandwidth aggregation and load balancing.
- Industry-leading DPI signature database is able to recognize up to 3200 applications, enhancing the efficient application-based routing and optimizing bandwidth usage.
- DPI signature database is updated each week and delivers more accuracy to traffic shaping.
- Integrated smart AC control supports unified management of AP.
- The series enables accurate control based on websites and applications.

- Over 10 portal authentication methods provide uncompromising operational excellence for all types of application scenarios and business requirements.
- The series offers a platform for digital marketing, supporting accurate, fast and customized marketing.
- Powered by ZISA Cloud, its unified management delivers remote management, simplifying operations and reducing maintenance cost.
- Tencent Cloud and ZISA's innovative IP Separation protect the network from any security threats.
- ZISA trusted products adhere to Computer Information System Security Product Sales License issued by the Ministry of Public Security of the People's Republic of China.
- The series offers over 100 innovative techniques to meet the networking needs of businesses of all sizes.
